NAPOLEON AT ST. CLOUD. - Of Napoleon's home at St. Cloud, a Paris correspondent

His Majesty's private apartments are most simple, and comprise a bed-room, a dressing-room, and a cabinet de travail. If it were not for sonvenirs of Napoleon I. and Queen Hor tense, nobody would suspect this to be the Emperor's enbinet. His Majesty indifferently uses quill or steel pens, and while he writes he scatters the residue of his cigarettes upon the inkstand plate. No people can be more united than the three chief inmates of the Palace de St. Cloud; and when politics and etiquette can be laid aside, no happier father, mother and son can anywhere exist.

The Empress and Prince enter the Emperor's room as soon as Felix, the first valet de chambre, has let them know thas his master is up -which just now is generally between 7 and 8 A. M. M. Conneau, a friend rather than a physician, M. Conti, both a friend and a secretary, and General Malerbe, follow soon after. The latter comes to take orders for the day, including the "bill of lare" for the breakfast and dinner. But at all times the dishes are of the simplest description, chiefly roast meats, and whatever they are Napoleon III, is always

NEW YORK has a population of from 800,-000 to 1,000,000. Its inhabitants represent forty different nationalities. 31,000 births, 25,000 deaths, 17,000 marriages are recorded in it annually. Its population consumes 4,000,000 barrels of flour, 2,776,302 beef cattle, calves, sheep and swine, \$30,000,000 worth of tea and coffee, \$40,000,000 worth of liquors, \$2,000,-000 worth of ice, annually, besides 60,000,000 gallons of water, daily employed to wash the city and citizens. It has 300 public schools, numbering 105,000 pupils, and 3,000 private schools with 25,060 pupils; 430 churches 315 religious, charitable and moral associations .-The total valuation of real and personal estate in the city is \$965,326,614. \$7,000,000 are spent in its places of amusement; the cost of the police, courts and prisons is about \$4,500,-000. It has 1,500 professional thieves and at least 100 establishments for the receipt of stol-

NEW FOOD FOR INFANTS .- M. Nestle, of Vevay, has proposed the introduction of a new food for young infants, to which he gives the name of lactual farina. This food is composed of perfectly pure milk evaporated in a vacuum at a low temperature, of bread which had been submitted to high temperature, and of sugar. These ingredients are incorporated in certain proportions, calculated to produce a food of similar composition to human milk. By diffusing 1000 parts of this food through 3000 parts of water, a milk is obtained which contains in 1000 parts 4,87 parts of nitrogen and 1.7 part of milk. Woman's milk contains 4 83 of nitrogen and 2 of salts, consequently the two liquids are very nearly identical in the proportions of their elements. M. Nestle very justly observes, that for the nourishment of the infant nothing can fully replace the milk of the mother.

Dr. Mary Walker's Eusband, or some one reporting himself as "sich," has sent a poem to the Independence (Mo.) Sentinel of which the following is a "stanzer:

The bird calls from its gilded cage, Its mate far in the wildwood; And so my soul still wails for thee, Bright angel of my chilhood. But if our fate, a cruel lot,

Hath cut our hearts assever, Why, Mary-bring my trowsers back 1 And then go vote forever !

MISCELLANEOUS ITEMS. - On Friday evening as Madame Perepa-Rosa was preparing for the in Boston opera she received intelligence of the death of her mother, in London. The news was wholey unexpected, for although the deceased was an invalid, recent letters reported her health to be as good as it had been for months. The deceased was a member of the celebrated Seguin family-a sister of Edmund Seguin, the famed baritone, so well remembered by old op

The latest method of curing conumption is that practised at an establishment on the banks of the Rhine called the "grape cure," Patients have excellent quarters plenty of fresh air, and every day go into the gardens, each one earry ing a basket, which is filled under the watchfu! eye of the doctor. The patient then retires to a pleasant arbor, and slowly sucks the grapes. A fine orchestra enlivens the curing process with excellent music. How delightful. It is plaimed that permanent cures are effected in

from four to six weeks. Another bunging hanging is reported from North Carolina. When the drop fell the knot worked around under the condemned man's chin, and, catching it with his hands, he managed to get his feet again on the platform, wherepuon the Sheriff tripped him up and he fell again.

Evansville, Indiana, is becoming more important, every year, as a wholesale market for and NUTT COAL for sale by tobacco. The shipments in 1868 '69 to that anticipated that during the season of 1869.70 there will be received over 18,000 hogsheads.
